

PRESSGLASS

UK'S NUMBER ONE

**THE NUMBER ONE CHOICE IN THE UK
TO DEVELOP YOUR FENESTRATION BUSINESS**

OUR VISION
WE ARE HERE TO MAKE A DIFFERENCE

The number one choice in the UK to develop your fenestration business

Since our formation in the 1980s, we have been driven by a clear vision; to provide our customers with what they want, when they want it, and at a fair price. Over the years, we have built a modern, continuously evolving organisation. We are part of the Press Glass Group, who are the largest independent sealed unit manufacturer for the construction and window industry in Europe.

We are the UK's number one choice for Insulated Glass Units. Our commitment to our customers is to surpass their expectations through exceptional performance by continuing to manufacture and deliver products and services. We are a dynamic, innovative, and people-orientated organisation, employing a diverse skill set to work with our products.

Our vision, coupled with the trust of our customers, enables us to supply the largest market share of Insulated Glass Units within the UK.

A NATIONAL COMPANY WITH FULL NATIONWIDE COVERAGE

Wherever your fenestration business is located, we are ready to work with you and help grow your business.

The location of our six factories, our production capacity, industry certification and product range, strengthen our position and provide an effective response to the demands of regional markets.

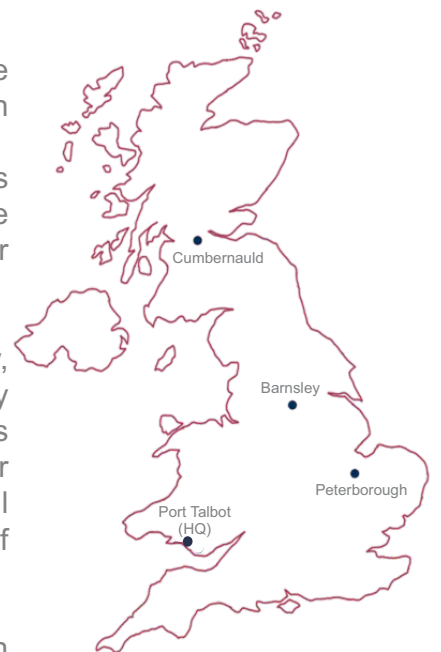

Each of our factories specialises in a range of products and enables us to **exceed market expectations**. Combined, they create an effective network.

Our transport fleet comprises over 100 vehicles with satellite tracking. From vans to 44-ton articulated trucks with MOFFETT Mounity systems to enable forklift truck unloading by our drivers. We offer

stillage deliveries which can be packed to specific requirements in accordance with customers needs. Owing our transport fleet allows us to offer you **shorter lead times** and the ability to fulfil any urgent orders for next day delivery.

We are equipped to supply window, door, and conservatory manufacturers and installers throughout the UK, responding faster than our competition and still considering the individual needs of every customer.

We are a **trustworthy** supplier with an ethos of care.

WE BELIEVE OUR EMPLOYEES ARE OUR GREATEST ASSET

We also believe that our values contribute to a great atmosphere and an effective work environment.

A GREAT TEAM OF DIVERSE AND EXPERIENCED STAFF

We are committed to five essential values: Respect, Integrity, Trust, Discipline, and Engagement, which we apply to everything we do. We have built an organisation where our greatest asset is our employees, and we believe that our values contribute to a positive and successful working environment.

Modern technology and strong logistics are essential to our operation however, it is our employees that are vital to the success of our business.

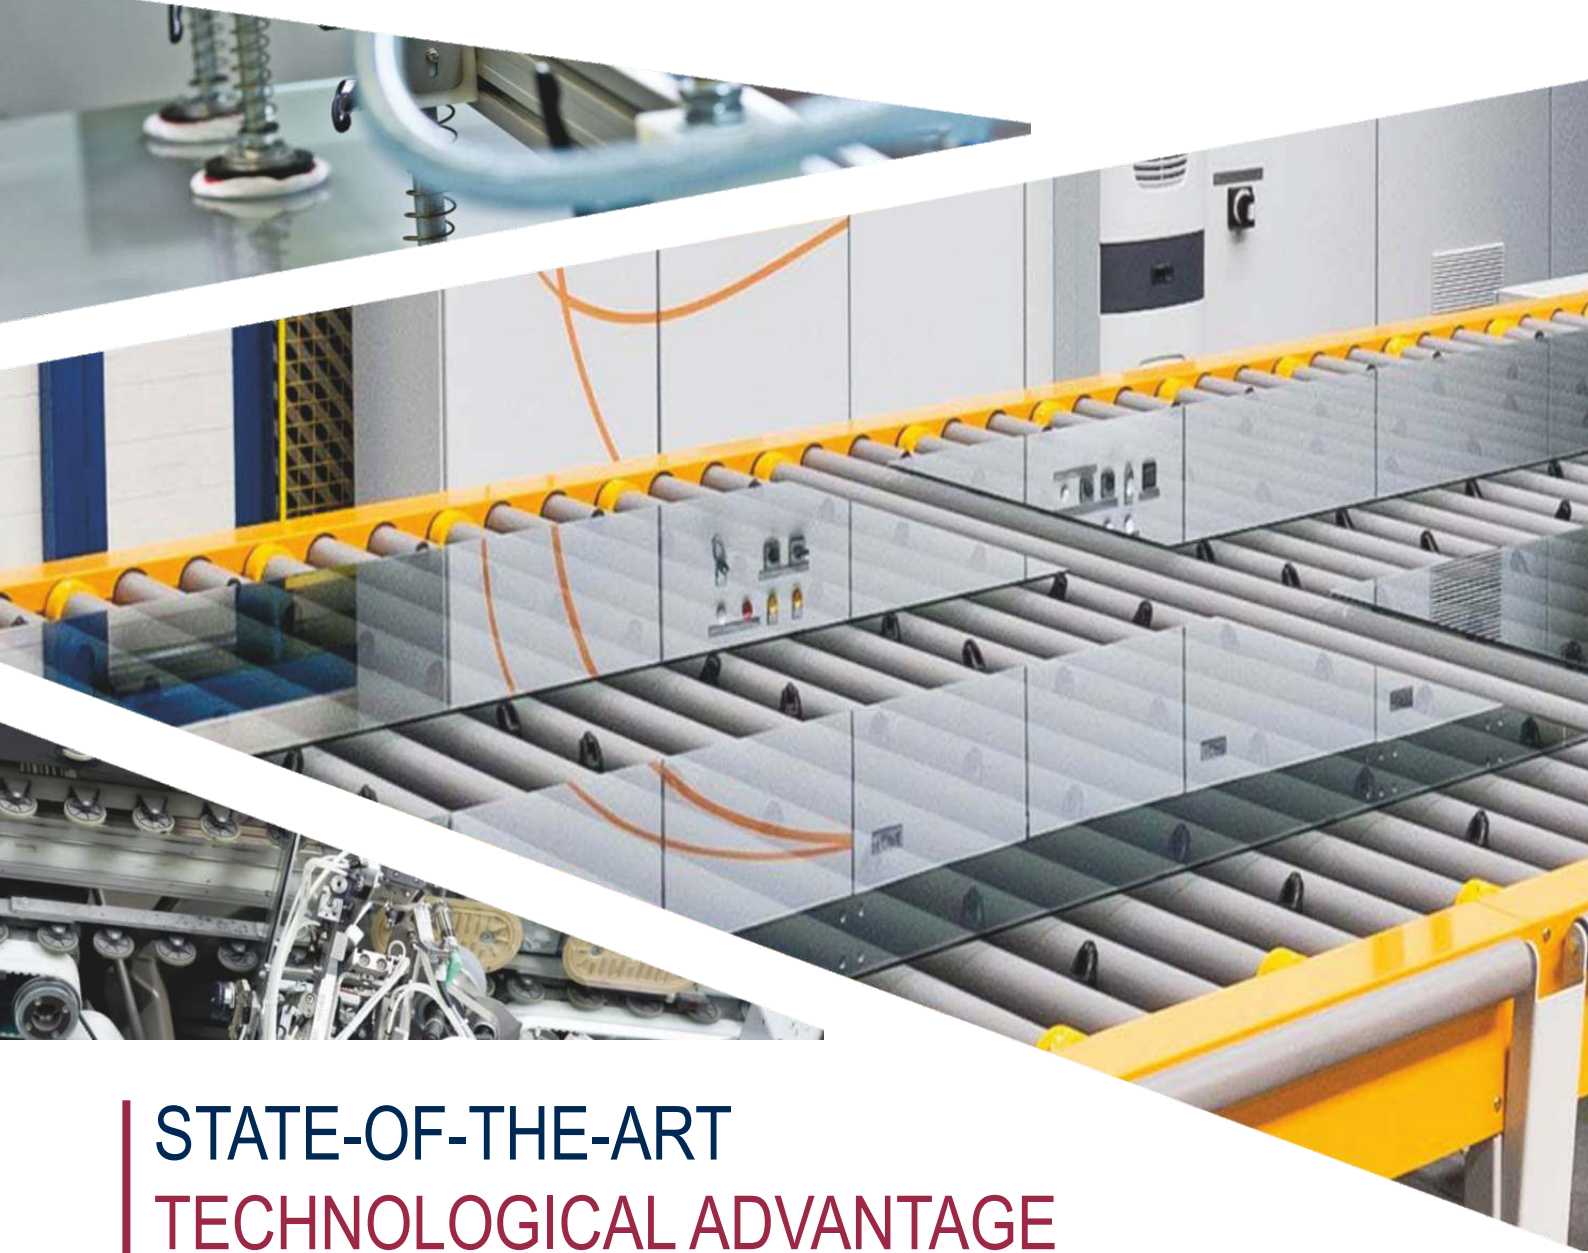

We invest heavily in the development and training of all our staff. We have built a robust team with the technical expertise committed to putting the needs of our customers first.

As a result of this, we manufacture high-quality products and provide our customers with exceptional service.

If you are looking for a flexible and fast ordering process, short lead times and, rapid response to emergency requests, look no further.

The image is a composite of two photographs. The upper portion shows a large, blue industrial robotic arm in a factory environment, with various cables and mechanical parts visible. The lower portion is a close-up, angled view of a complex mechanical assembly, possibly a part of a machine or a component being processed, showing metallic surfaces and a red-colored ring or seal.

WE CONTINUOUSLY EXPAND AND
MODERNISE OUR MACHINERY

STATE-OF-THE-ART TECHNOLOGICAL ADVANTAGE

To guarantee the highest quality for our customers, our glass is processed using automated robotic machinery from the most reputable manufacturers, including LISEC and HEGLA glass cutting lines, LISEC and BYSTRONIC IGU assembly lines, GLASTON and COOLTEMPER tempering furnaces.

Our products come with a 10 year warranty.

As part of the Press Glass Group, we are included in a cooperation program where we help our suppliers define the direction

of their development. We participate in testing and implementing new equipment and technologies. Through such equipment innovations, we continuously expand and modernise our machinery.

Similarly, we regularly monitor and update our fleet of trucks. This is how we gain and maintain the technological advantage and improve our production efficiency.

CONTINUOUS GROWTH

A STABLE PARTNER TO GROW YOUR BUSINESS

1988

The company was formed in Swansea in 1988, comprising of one manual IGU production line. Since then, we have been driven by a clear vision to provide our customers with what they want, when they want it, and at a fair price. In the early 1990s, a customer base was established in Wales and along the M4 corridor.

1996

The subsequent years saw an increase in business, and the need to toughen our glass, which resulted in setting up our in-house toughening facility previously known as Press Glass Climate Limited.

2003

Our expansion continued, and in 2003 a move to a purpose built factory in Swansea, and the investment to automate many of the processes became a necessity. This 50,000 sq. ft. purpose-built factory set up with three robotic Sealed Unit lines, two autoloading cutting lines, and three spacer bar benders, can produce up to 30,000 Sealed Units per week. This combined with the latest state-of-the-art electronic ordering, optimisation, and planning software meant that we could expand into the Southern and the Southeast of England.

2014

In 2014 we invested in a new 40,000 sq. ft. factory in Peterborough. Chosen for its location, which is just off the A1 motorway to supply Insulated Glass Units into Essex, Norfolk, Suffolk, East Anglia, and South Yorkshire. The site is equipped with three robotic Sealed Unit lines, three cutting lines, and a Tamglass 2448 Pro Convection Toughening furnace. The site produces over 20,000 Insulated Glass Units per week.

2015

In 2015 we became part of the globally active Press Glass Group, the largest independent IGU manufacturer for the construction and window industry in Europe. This meant that we became part of global organisation. We started the process of merging our values, advantages, and methods of operation to give more benefits to our customers.

2017

In 2017 we acquired two factories in the UK from Pilkington, one in Barnsley and the other located just outside Glasgow. Our vision was to invest and grow both and continue to strengthen our share of the UK market and provide national coverage.

2007

In 2007 we acquired a factory based just north of Cardiff. This site was based on the flagship site in Swansea to provide a common brand for us. This gave us the further capacity and the ability to service an increased geographical area from the Southwest of England to the Northwest of England.

Press Glass Direct is equipped with two robotic Sealed Unit lines, two autoloading cutting lines, an automatic glass arriser, and a Cool-temper toughening furnace. Along with our state-of-the-art software, this factory can produce up to 17,000 Insulated Glass Units per week.

2009

In 2009 we established Climate Glass, a brand-new portfolio of Insulated Glass Units dedicated to the conservatory and roof glass market. Over time the brand's reputation has continued to grow and has been characterised by many advanced features, significantly increasing users' interior comfort. Our Climate Glass products are available within our Advanced Glass Options range.

The model of services offered to customers by us and the introduction of Climate Glass saw an upsurge of new customers. As a result, the company made a further investment to give current and prospective customers exactly what they wanted, when they wanted it, and at a fair price.

2010

Thanks to our customers' trust in 2010, we became the leading producer of Insulated Glass Units for the fenestration industry, with the largest share of the UK's market. Since then, our customers have further benefited thanks to the continuous increase in our stability and capacity. In turn, this has assisted our customers in their business growth.

2024

Our business continues to grow and strengthen, which is driven by the quality of our products, the service we provide and the introduction of new innovations within our sites. We have decided that now is the right time to re-launch as Press Glass, realigning our brand identities with our parent company. This is a natural progression for us, and it will not only be a benefit for our company but also strengthen the business within our industry.

We will become Press Glass on the 1st April 2024.

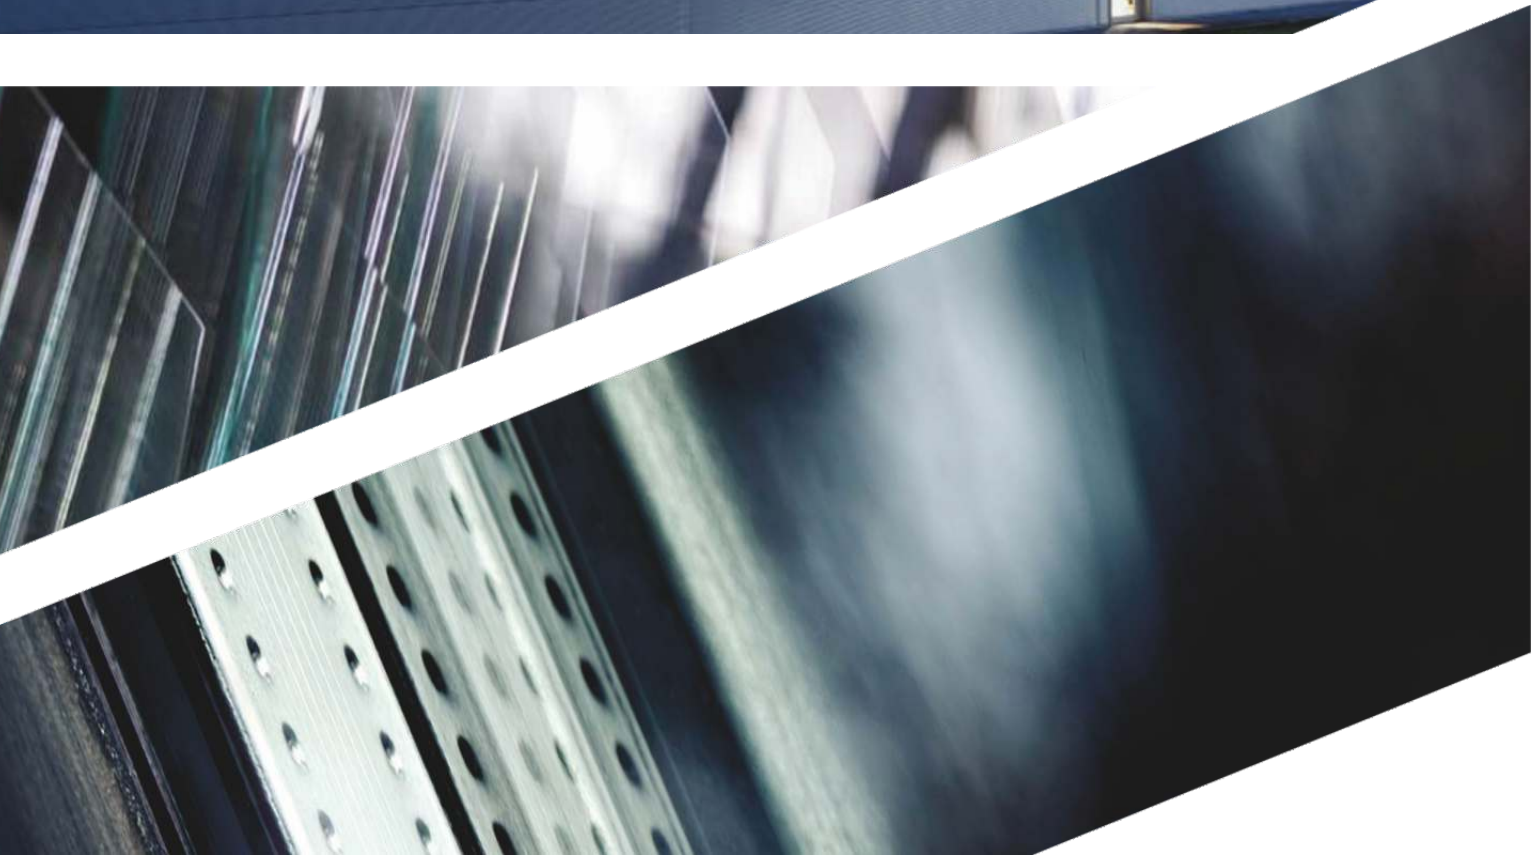

2025

The decision was made to acquire land in Port Talbot, South Wales in 2023 and also purchase a detached self-contained factory in Peterborough. The amalgamation of our three existing sites in South Wales into the new state of the art factory, equipped with new technology and machinery, has increased our production capacity in Wales from 40,000 > 60,000 IGUs per week.

The relocation to the new factory in Peterborough, has

also increased their capacity from 20,000 > 24,000 IGUs per week.

We want to continue our journey to grow as a sustainable business and reduce our carbon footprint and the investment in these new sites will enable us to do this and enhance our current support to our customers in the IGU market within the UK.

OUR FACTORIES

WE OPERATE NATIONALLY BUT CARE LOCALLY. WE ARE A NATIONWIDE BRAND THAT IS CLOSE TO YOU.

OUR VERY OWN BRAND - A NEW GENERATION OF 'INTELLIGENT' GLASS

Climate is the UK's market leader for conservatory roof glass.

When designing your conservatory, the material you select for your roof can make all the difference to all-year-round comfort. Compared to polycarbonate, glass offers a much longer lifespan **with traffic and rainfall noise reduction by over 100%**.

And now, with the introduction of Climate products, your conservatory can be enjoyed whatever the weather.

Climate glass creates a **"room for all seasons"** with the new range of conservatory roof glass.

PRODUCT RANGE

WE OFFER A WIDE RANGE OF PRODUCTS IN THREE MAIN CATEGORIES

INSULATED
GLASS UNITS

Insulated Glass Units that provide **thermal efficiency**, and other optional features from our range of **high-quality** Sealed Units.

ADVANCED
GLASS OPTIONS

The most **versatile and modern** products from our portfolio.

For those looking for solutions offering the **best performance** and resistance for all seasons and through-out the years.

DECORATIVE
OPTIONS

Our wide range of **Decorative Glass** allows you to add a personal touch of style and elegance to your home.

Choose one of our ready-made templates or create your own **bespoke design**.

GIVE YOUR HOME MUCH MORE
THAN JUST LIGHT AND A VIEW

WE OFFER GLASS PRODUCTS
TO MANUFACTURERS OF

WINDOWS

DOORS

CONSERVATORIES

GLASS ROOF

THE BENEFITS OF USING OUR PRODUCTS

In modern construction, there are a variety of challenges facing transparent wall partitions, for which our products provide solutions. Our Glass Units can provide safety, protect against heat loss and overheating, reduce noise pollution, and constitute a temporary form of protection against burglary. These are only some, amongst many other benefits.

Using the **latest technology**, our glass units help to protect your furniture and fabrics from fading by reducing the transmission of UV light. You can have self-clean coating that uses nature's forces

such as rain and UV rays to help keep the glass clear of dirt and grime, creating the benefits of less cleaning, and at the same time, visually cleaner glass.

FOR LONGER

WORKING TOWARDS A GREENER FUTURE

We are proud that our products contribute to a greener environment thanks to the benefits they provide, especially giving thermal comfort and climate performance in winter and summer and reducing the use of natural resources. In short, you use less energy to keep your house warm in the winter or keep it cool in the summer.

REDUCING ENERGY COSTS

We are all looking for ways to reduce our energy costs, and fortunately, IGU manufacturers are focusing on helping you achieve this by introducing more and more advanced energy-saving solutions.

Hot summers highlight the importance of using effective solar control products in reducing the costs associated with maintaining thermal comfort. Our solar control products can combine thermal efficiency features to reduce overheating, air conditioning costs, and excessive heat loss during colder months, increasing comfort levels of building interiors.

ADDITIONAL FEATURES

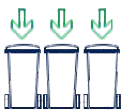

Our product range can further improve comfort levels thanks to the additional benefits they provide, such as noise and light transmission control, safety and security.

WE SOURCE ENVIRONMENTALLY FRIENDLY MATERIALS

WE ARE MINDFUL OF OUR ENERGY USAGE

WE RECYCLE TODAY FOR A BETTER TOMORROW

NO PLACE FOR CONTAMINATION

ENVIRONMENTAL PROTECTION

We are continuously improving our manufacturing processes to reduce our carbon footprint.
